Re: Findings for the lineage of Gloria Arellanes

---

On January 15, 2018, I issued you a memo regarding the findings for the lineage of Gloria Arellanes which were produced from a quick review of information I could locate through internet resources. Since, then I have been able to review much more evidence, thanks to your help, which helps me soundly conclude that Gloria Arellanes is not of any California Native American Indian descent. There is no doubt about that. The enclosed report discusses the details of all my findings on that matter.

Secondly, because of Arellanes’ deplorable actions at attempting to be a Gabrieleno Indian, in the public eye, I have included my investigations and conclusions on that matter as well in the summary introduction of my report—which is that Arellanes knowingly misappropriated your tribal cultural and heritage. I sincerely hope the involved agencies will be supportive of your effort to correct the record and, perhaps, undo the damage she has done already.
